

**GIS Analyst:**

FBD has an exciting new role for a GIS Analyst.

**Overall Purpose of the role:** The key purpose of the role is to increase the variety, availability and use of GIS data in FBD. The GIS Analyst will have responsibility for the creation and maintenance of GIS data and for the implementation of GIS data and technology across the company. The successful candidate will work closely with Underwriting and Pricing teams to utilise GIS capabilities to strengthen Underwriting Strategy. Whilst this role is a part of the Underwriting function, the GIS analyst will work with other key functions, including marketing, sales and claims. The GIS analyst will also be responsible for relationship management with third party suppliers and will represent FBD at industry and market events relevant to GIS.

**Key Duties / Responsibilities:**

- Responsibility for creation and management of GIS tools to enable underwriters to price and manage risk more effectively.
- Specialist input into strategy based on analysis of GIS data
- Perform complex data analysis using GIS tools, apply the capabilities of GIS to solve complex spatial and relational problems.
- Data extraction, compilation, manipulation and analysis
- Leading the implementation of GIS related deliveries across FBD.
- Providing advice on the further utilisation of GIS technologies across Underwriting and Pricing and how it can be incorporated into the value stream.
- Management of third party supplier relationships and contracts
- Representing FBD at Industry and market events
- Identification of external data sources within Underwriting and pricing

**The ideal candidate must:**

- Hold a Degree qualification in Geographic Information Systems (GIS) or an equivalent qualification.
- Have at least 2 years satisfactory relevant GIS experience.
- Have demonstrable knowledge and experience in the following areas;
  - Spatial databases and database management.
  - Data extraction, conversion, cleaning and analysis.
  - Map design and production.
  - Experience in the creation, maintenance and interrogation of spatial datasets.
  - Knowledge of data quality issues, standards and metadata.
  - Awareness of GeoDirectory, OSI, CSO, Gamma and Lexis Nexis and other available data sources.
- Have strong IT and graphic skills and proven ability to present maps and documents to a high standard.
- Possess excellent problem solving and analysis skills.
- Possess strong written and verbal communication skills, with the ability to explain complex GIS technical concepts to non-technical users.
- Be a good team player.
- Be results orientated and be flexible in a changing environment.
- Strong planning & organisation skills.
- Proficiency in the use of MS office including Excel, Access and PowerPoint.
- General Insurance experience is desirable

**This role is being offered on a permanent contract.**
